## Minnesota Academic Standards

## Kindergarten Mathematics

| Strand | Standard | Number | Benchmark |
| :--- | :--- | :--- | :--- |
|  <br> Operation | Understand the relationship <br> between quantities and whole <br> numbers up to 31. | K.1.1.1 | Recognize that a number can be used to represent how many objects <br> are in a set or to represent the position of an object in a sequence. <br> For example: Count students standing in a circle and count the same <br> students after they take their seats. Recognize that this rearrangement <br> does not change the total number, but may change the order in which <br> students are counted. |
|  <br> Operation | Understand the relationship <br> between quantities and whole <br> numbers up to 31 | K.1.1.2 | Read, write, and represent whole numbers from 0 to at least 31. <br> Representations may include numerals, pictures, real objects and <br> picture graphs, spoken words, and manipulatives such as connecting <br> cubes. <br> For example: Represent the number of students taking hot lunch with <br> tally marks. |
|  <br> Operation | Understand the relationship <br> between quantities and whole <br> numbers up to 31 | K.1.1.3 | Count, with and without objects, forward and backward to at least 20. |
|  <br> Operation | Understand the relationship <br> between quantities and whole <br> numbers up to 31 | K.1.1.4 | Find a number that is 1 more or 1 less than a given number. |
|  <br> Operation | Understand the relationship <br> between quantities and whole <br> numbers up to 31 | K.1.1.5 | Compare and order whole numbers, with and without objects, from 0 <br> to 20. <br> For example: Put the number cards 7, 3, 19 and 12 in numerical order. |
|  <br> Operation | Use objects and pictures to <br> represent situations involving <br> combining and separating. | K.1.2.1 | Use objects and draw pictures to find the sums and differences of <br> numbers between 0 and 10. |
|  <br> Operation | Use objects and pictures to <br> represent situations involving <br> combining and separating. | K.1.2.2 | Compose and decompose numbers up to 10 with objects and pictures. <br> For example: A group of 7 objects can be decomposed as 5 and 2 <br> objects, or 2 and 3 and 2, or 6 and 1. |

| Kindergarten Mathematics |  |  |  |
| :---: | :---: | :---: | :---: |
| Strand | Standard | Number | Benchmark |
| Algebra | Recognize, create, complete, and extend patterns. | K.2.1.1 | Identify, create, complete, and extend simple patterns using shape, color, size, number, sounds and movements. Patterns may be repeating, growing or shrinking such as ABB, ABB, ABB or $\bullet, \bullet \bullet, \bullet \bullet \bullet$. |
|  <br> Measurement | Recognize and sort basic twoand three-dimensional shapes; use them to model real-world objects. | K.3.1.1 | Recognize basic two- and three-dimensional shapes such as squares, circles, triangles, rectangles, trapezoids, hexagons, cubes, cones, cylinders and spheres. |
| Geometry \& Measurement | Recognize and sort basic twoand three-dimensional shapes; use them to model real-world objects. | K.3.1.2 | Sort objects using characteristics such as shape, size, color and thickness. |
|  <br> Measurement | Recognize and sort basic twoand three-dimensional shapes; use them to model real-world objects. | K.3.1.3 | Use basic shapes and spatial reasoning to model objects in the realworld. <br> For example: A cylinder can be used to model a can of soup. Another example: Find as many rectangles as you can in your classroom. Record the rectangles you found by making drawings. |
|  <br> Measurement | Compare and order objects according to location and measurable attributes. | K.3.2.1 | Use words to compare objects according to length, size, weight and position. <br> For example: Use same, lighter, longer, above, between and next to. Another example: Identify objects that are near your desk and objects that are in front of it. Explain why there may be some objects in both groups. |
| Geometry \& Measurement | Compare and order objects according to location and measurable attributes. | K.3.2.2 | Order 2 or 3 objects using measurable attributes, such as length and weight. |
